REASONS FOR ALLOWANCE

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The references cited on the PTO-893 disclose a STM or AFM system for reproducing data from a recording medium.

The following is an examiner's statement of reasons for allowance: the prior art of record considered as a whole fails to teach or suggest a probe storage device or method for detecting data in a probe storage device, the probe storage device comprising: a storage surface for storing data represented by deformations in the surface; a probe facing the surface and **including a resonant circuit having a reactance dependent on deflection of the probe relative to the surface**; a scanner for scanning the probe across the surface such that the probe follows the deformations; and, a detector **for reading data stored on the surface by detecting variations of the resonant frequency of the circuit**. (bold/underlined language emphasized)

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Paul Huber whose telephone number is 571-272-7588.
